Object: *adhesion of Algeria to the International Mathematical Union*

Dear Sir,

I am writing this letter on behalf of the Mathematical Society of Algeria (SMA) to initiate the process of adhesion of Algeria to the International Mathematical Union (IMU). Indeed, our aim is that Algeria becomes a member of the Union through our Society.

Following the guidelines provided on the website of the IMU, I am attaching all the accompagning documents required by the membership application. So, you can find a file containing:

- a sample of conferences organized by mathematicians from Algerian Universities, during the last ten (10) years;
- a sample of research papers published in international journals by mathematicians from Algerian Universities, during the last ten (10) years;
- a sample of mathematicians from Algerian Universities;
- faculties, institutes and departments of mathematics of Algerian universities;
- research Laboratories of Mathematics of Algerian Universities;
- numbers 1 and 2 of the SMA bulletin.

Please, let me know if anything else is necessary to complete the application process.

Sincerely yours,
