

TESTIMONIAL – Dr. Adeolu Taiwo

I want to appreciate the International Mathematical Union for the financial support I received for my PhD studies through the International Mathematical Union Breakout Graduate Fellowship (IMU-BGF) Award. It's such a great privilege to be a recipient of the prestigious IMU-BGF Award.

I commenced my PhD degree program in July, 2018 at the University of KwaZulu-Natal, South Africa. Things were a bit challenging at the first year of the studies because I had no funding. Although the university offers fee remission, the cost of living is very high and it's difficult for students to survive without funding.

After being granted the award in October 2019, I was able to focus more on my studies. The award enabled me to settle my educational and living expenses. This further motivated me to intensify efforts in my research and became more productive. I was able to attend conferences, symposia and schools. Many of the achievements I made in my PhD studies won't have been possible without the financial support from the fellowship. Indeed, the award made my PhD studies progress with ease, joy and peace of mind, knowing that the financial burden had been taken care of.

Also, being internationally recognized set a pace of aiming high in my academic pursuit. This gave me the encouragement to apply for postdoctoral opportunities, and I have been awarded a postdoctoral fellowship at the Technion-Israel Institute of Technology.

Thanks to the IMU for this great opportunity.
