

International Conference on Algebra and Related Topics (ICART 2018)

July 02 - 05, 2018

Mohammed V University

Faculty of Sciences, Rabat

Activity report

ICART2018 was a great event that gathered more than 30 nationalities (more than 180 participants). The sessions were passed in excellent conditions and knew various outstanding contributions (see the abstract booklet and Programs of the three sessions).

Researchers including PhD students have benefited. Several joint PhD projects are envisaged. For instance, four of my students have been involved in international PhD projects with great researchers from USA, Spain and France.

The conference was followed by a two-days excursion to Marrakech city (see Photos at the bottom of <http://fsr.um5.ac.ma/icart2018/index.html>).

Finally, we are actually working on the proceedings of the conference which will be published in the Journal "Algebra Colloquium" and in "Contemporary Mathematics" of the American Mathematical society (For more details see <http://fsr.um5.ac.ma/icart2018/proceedings.html>).
