Dear Lena Koch

Thank you for your reply.

Please notice that this year the ministry changed the schedule of the academic year and this was done after our application.

Usually the second semester teaching is done between mid/end of march until mid/end june of each year.

This year the semester 2 teaching will be split into two parts as following

Part 1 : february 5 - march 23

Part 2 : april 22 - june 1

Between the two parts we will have a session of catch up exams related to semester 1.

This situation is rather unusual in Algeria and I never worked with such a schedule for more than 10 years

We completely understand that the processing and transfer could take some time.

All the best.
