Invitation letter

Dear colleague,

It is my pleasure to invite you to deliver the lectures of the course "Dynamical systems II" which is part of our Master program in mathematical analysis.

The course is about symbolic dynamics and will take place during the second semester of the academic year 2022-2023.

It will be preceded by a course entitled "Dynamical systems I" given by our colleague Dr Rezki Chemlal about basic topological dynamics with a little emphasis on dynamics of the interval during the first semester.

You will coordinate your work with Dr Rezki Chemlal who will be responsible for local tasks and tutorial sessions.

Best wishes.

Le chef du département de mathématiques

Rezki
