Short report:

Briefly my scientific visit took place at University of Sussex from 10th September till 11th October 2017. My host and I worked mainly on fractional magnetic operator and rightnow we are expecting a first draft which will be submitted before the end of 2017.

We also have discussion on new project we want to face in the future that is concerned with non-local spectral analysis. To end my scientific stay I had a seminar talk at the math department of Sussex University on 2nd October 2017 at 3 pm.
