NR. 23/24   DEZEMBER 1952

WIEN

sous un nouveau titre, pour documenter plus efficacement la devise „toujours et partout". En plus, la revue sera dorénavant publiée en trois langues et, par conséquent, rédigée par un comité éditorial de composition internationale. Il est à espérer qu'il sera possible d'observer des intervalles réguliers pour la publication des cahiers. Le numéro 21/22, étant exclusivement réservé au reportage du IIIe Congrès Autrichien de Mathématiciens, paraîtra plus tard et encore sous la forme ancienne.

Par la transformation du „Nachrichten", la Société Mathématique d'Autriche espère avoir progressé dans le sens de la devise mentionnée ci-dessus. Les mathématiciens d'Autriche font appel à leur collègues dans tout le monde de collaborer avec eux, en tendant la main à chaque ami, dans le but de réaliser la devise:
