the world**

About

Since 2013, the Abel Visiting Scholar Program supports young mathematicians under the age of 35 from developing countries to carry out month-long research visits with international collaborators. These visits help strengthen scientific collaboration, foster research excellence, and build long-term academic partnerships. From 2026, the program will be revised to target Ph.D. students.

**Abel Visiting
Scholar Program**

Strengthening Collaboration in
Mathematics Research

Funding

The Abel Visiting Scholar Program is generously funded by the Abel Prize in Mathematics, which partners with the International Mathematical Union to advance mathematics in developing countries and promote international collaboration in research.

This program provides mathematicians from emerging regions the opportunity to collaborate internationally, exchange knowledge, and advance research careers in mathematics.

Selection

Fellows are selected through a competitive process based on academic merit, the quality and feasibility of the proposed research project, and the relevance of the collaboration. Applicants must be based aged under 35, be based in developing countries and hold a Ph.D. in mathematics or a related field.

Program Benefits

The fellowship offers up to USD 5,000 to cover travel, accommodation, and living expenses during the research visit.

Our Impact

41 Grants Awarded
18 Countries Impacted

” Our Grantees

“This opportunity has allowed me to broaden my knowledge, pursue new research possibilities, and network with mathematicians from all over the globe. The program has enabled me to engage in workshops, hear lectures, and collaborate with researchers at the University of Gottingen. These experiences have significantly improved my mathematical skills and knowledge and will surely boost my future research.”

– Mudasir Younis, Lebanese University, Lebanon
2022 Abel Visiting Scholar

“My visit was one of the most productive collaborations throughout my research career, which provided me with the opportunity to meet and interact with researchers in the prestigious university like Waterloo. Moreover, as my host was one of the main organizers of a workshop at Fields institute in Toronto, I had the chance to meet many experts in my field, which led to exchange of research ideas.

– Bootan Rahman, University of Kurdistan-Hewlêr at Erbil, Iraq
2020 Abel Visiting Scholar
