

THE HEIDELBERG LAUREATE FORUM

*Leaving half of humanity behind
is an unacceptable waste of resources for societies.
Education and science must be accessible to all.*

Dr. h.c. Klaus Tschira – Founder, Heidelberg Laureate Forum Foundation

Meet laureates of the most prestigious prizes in mathematics and computer science.

Exchange ideas across disciplines and generations.

Present your own research to the top minds in your field.

Collaborate, engage, and form long-lasting connections with fellow young researchers.

A UNIQUE EVENT

The HLF is an annual scientific networking conference where 200 carefully selected young researchers in mathematics and computer science engage in cross-generational and interdisciplinary dialogue with recipients of the most prestigious prizes in their fields: recipients of the Abel Prize, ACM A.M. Turing Award, ACM Prize in Computing, Fields Medal, IMU Abacus Medal, and Nevanlinna Prize.

CONTEMPLATION MEETS INSPIRATION

The HLF's scientific program inspires ideas and fosters lively exchanges through a variety of formats, such as lectures, panel discussions, workshops and a number of outreach activities.

WHERE PEOPLE AND IDEAS CONNECT — THROUGH MATHEMATICS AND COMPUTER SCIENCE

SUSTAINABLE NETWORKS

Our exclusive alumni activities provide long-term networking and career growth opportunities for young researchers, even after the HLF.

PERSONAL AND DOWN-TO-EARTH

The intimate and informal setting of the HLF provides the space and time for relaxed, unmediated exchange, networking, as well as the opportunity to continue the scientific debates of the day during the evening's social events.

ENGAGING MINDS, INSPIRING ACTION

We offer an interactive program that makes mathematics and computer science engaging and sparks curiosity. Members of the HLF community are encouraged to contribute ideas, share knowledge, and connect with a global scientific community.

**HEIDELBERG
LAUREATE FORUM
FOUNDATION**

The Heidelberg Laureate Forum Foundation (HLFF) is a non-profit foundation dedicated to advancing mathematics and computer science. Through its activities, the HLFF fosters international exchange, supports the next generation of researchers, and helps make cutting-edge scientific research accessible to all. The HLFF is funded by the German foundation Klaus Tschira Stiftung.
