Committee for Women in Mathematics

CWM

# CWM funding call for 2027

https://www.mathunion.org/cwm

The IMU **Committee for Women in Mathematics** (CWM) invites proposals for funding of up to €3,000 for activities or initiatives that support women in mathematics and take place between March 2027 and February 2028. Applications must be submitted by **23:59 CET on January 8, 2027**, via the IMU Grants homepage: https://grants.mathunion.org/.

Proposals should fall under one of the following categories:

a) **Establishing or supporting networks for women in mathematics**, preferably at the continental or regional level, with priority given to networks in developing countries. Activities might include organizing regional events, mathematical activities or round tables, creating videos, films, or exhibitions, and setting up or improving websites.

b) **Research workshops aimed at establishing research networks for women.** Research Collaboration Conferences for Women, in which junior and senior women work together on pre-defined research projects, are a successful model for such events. For events held in developed countries, CWM funding may be used only to support participants from developing countries. In all cases, higher priority will be given to events held in developing countries. Because organizing these events can take longer, events taking place in 2028 may be considered for this category if justified.

c) **Other ideas** for researching and/or addressing the gender gap in mathematics.

For any of these categories, the budget may include travel and/or accommodation expenses for participants from developing countries, infrastructure and logistics, childcare, and similar costs. Please note that **funding for individual research projects is not available.**

The application consists of a webform, to be completed in English, in which applicants provide specific information about their project and attach a single file containing the detailed budget. Apart from the budget, no files may be uploaded, and **proposals will be evaluated solely on the basis of the answers in the form**. You will need to register in the IMU Grant Management System before submitting your proposal. Each applicant may submit only one proposal per call.

When evaluating a proposal, CWM may share it with external consultants for their opinion. This will be the only call for applications for activities taking place in 2027. Applications must be submitted by **23:59 CET on January 8, 2027**. Depending on budget availability, successful applications may not be funded in full. Successful applicants will be informed no later than February 26, 2027.

If you have any questions about the call, or if you do not receive an automated reply after submitting your application, please email us at applications-for-cwm@mathunion.org.
